KORIS365

KORIS365 PEN TESTING

If cyber security is front and centre of your Board's agenda it may be an opportune time to take a thorough look under the bonnet of the business and identify any gaps that could be compromised.

To ensure we aren't assessing our own work we instruct a third party to provide truly independent Penetration Testing Services: whether that is comprehensive application testing, bespoke red team simulations or in-depth analysis of legacy systems, they can take the assessment of your security profile to the next level.

Using a combination of automated scans, meticulous manual testing and an innovative vulnerability platform, a customised testing plan will be tailored to your risk profile and unique business needs all delivered by experienced CREST and CHECK certified consultants.

Why us:

16 years of penetration testing across all sectors	CHECK and CREST accreditated	30 skilled and experienced testers	Full spectrum coverage including red teaming mobile testing, infrastructure and application testing, red teaming and ransomware simulation

What is special about our services:

- We wrap up the PEN testing programme in one easy to manage subscription
- All output delivered via our Gartner recognised platform with results in real time
- Subscription benefits include on demand remediation, support, free retesting cancellation guarantee and overall exposure scoring
- Our experts are CREST and CHECK certified

- Enhance reporting
- Real time vulnerability identification
- Reduced time to remediation through action tracking
- Risk scoring provides an aggregate risk score for your projects assets, applications and network to track risks reduction over time

Are you struggling to identify, track and remediate vulnerabilities and want to know:

.1
How to remediate vulnerabilities faster?

.2
How you are progressing with vulnerability remediation over time?

.3
How your risk is reducing over time?

What you get:

- Vulnerability management platform
- Retesting guarantee
- Cancellation guarantee
- Ongoing remediation support
- Automated scoping
- Automated scoping
- Jira integration
- Overall exposure scoring
- Single order and invoice

90 EMPLOYEES
The right size to deliver great service with agility

65% TECHNICAL EMPLOYEES
A trusted advisor driving technically and commercially beneficial changes

650+ CLIENTS
All shapes and sizes across numerous verticals

MULTIPLE NOC LOCATIONS & SOC
Our resilient NOCs and our SOC are geographically dispersed
