- Update existing requests

02 Customer care department

Customer care is at the heart of our ethos and has been from the start. We are always here for you day or night.

Whether you have a quick question or a pressing issue to resolve, our highly trained, enthusiastic technical team are on hand and here to help.

03

Logging enquiries

04 Priority definitions

You set the priority based on the impact to your business.

P1

A business critical system is down or there is a critical impact to your business operations. Koris365 will work with you and commit any and all necessary resources “around the clock” to resolve the situation.

P2

Operation of an existing system is severely degraded, or significant aspects of your business operation are negatively impacted by inadequate performance of Koris365 supported products. Working with you, Koris365 will commit full-time resources during contracted business hours to resolve the situation.

P3

Operational performance of the system is impaired whilst business critical functions remain available. Koris365 will commit all necessary resources during contracted hours to provide a resolution to the outstanding issue.

P4

You require information or assistance on product capabilities, installation or configuration. There is clearly little or no impact to your business operation. Koris365 are willing to provide resources during contracted hours to provide information or assistance as required.

05 Escalation path

STEP 1

Service Desk
0345 505 6365
support@koris365.com

With a great balance of skills across our business and technical teams that love to continually develop their expertise, we have great knowledge of emerging technologies as well as evolved technologies, so we can; implement; upgrade and adapt legacy technologies just as easily as implementing new technologies.

Customer service is a real focus for us, and something we are constantly trying to improve. We are committed to delivering beyond expectations which is probably why some of our customer relationships are as old as we are.

We have built an enviable reputation of technical expertise and continue to develop and foster knowledge all the time.

Our experts can help across a spectrum of IT solutions:
